⁽¹⁾ True widths of the reported mineralized intervals are not known

⁽²⁾ Assumptions used in USD for the copper equivalent calculation were metal prices of \$2.80/lb Copper, \$1,200/oz Gold, \$15/oz Silver, \$1.20/lb Zinc and recovery is assumed to be 100% as no metallurgical test data is available. The following equation was used to calculate copper equivalence:

Copper Equivalent = Copper (%) + (Gold (g/t) × 0.6252) + (Silver (g/t) × 0.007815) + (Zinc (%) × 0.4286).

⁽³⁾ Copper equivalent values are only reported for samples containing significant copper
