(1) True widths of the reported mineralized intervals are not yet known

(2) Assumptions used in USD for the copper equivalent calculation were metal prices of \$3.00/lb Copper, \$1,300/oz Gold, \$18/oz Silver, \$1.25/lb Zinc and recovery is assumed to be 100% as no metallurgical test data is available. The following equation was used to calculate copper equivalence: $CuEq = \text{Copper (\%)} + (\text{Gold (g/t)} \times 0.6319) + (\text{Silver (g/t)} \times 0.0087) + (\text{Zinc (\%)} \times 0.4167)$. The following equation was used to calculate gold equivalence: $AuEq = (\text{Copper (\%)} \times 1.5824 + \text{Gold (g/t)} + (\text{Silver (g/t)} \times 0.01385) + (\text{Zinc (\%)} \times 0.6593)$.
